

## Project case study FitzRoy House CAMHS

### Client

St Andrews Healthcare

### Main contractor

Galliford Try

### Location

Cliftonville Road, Northampton

### Sector

Mental health

### Contract value

£1.1m

### Products

Aluminium Safevent windows, door systems and curtain walling

FitzRoy House is Europe's largest adolescent mental health facility, located in Northampton. St Andrews Healthcare and P + HS Architects entrusted Britplas to supply all aspects of the external fenestration package.

The project involved the installation of Safevent external sliding windows, aluminium door sets and curtain walling sections as part of a £1m+ contract.

The facility comprises 110 beds split over 11 wards, a sports hall, communal areas and gardens to create one of the most modern facilities in the UK.

All products supplied by Britplas take into account the latest industry regulations relating to anti-ligature design and durability.

Britplas has a strong and lengthy working relationship with St Andrews Healthcare having worked on key projects together previously.
