Client

NHS Tayside

Main contractor

Morgan Sindall

Location

Perth, Scotland

Sector

Mental health

Contract value

£1 million +

Products

Safevent windows,
curtain walling,
windows, doors

One of Britplas' largest mental health projects in recent years, Murray Royal Hospital is a flagship new adult mental health facility in Scotland.

This project saw Britplas supplying the fenestration package to the new £79m facility which is located in Perth.

The facility includes 183 single-occupancy bedrooms, a mixture of adult and elderly acute mental healthcare and rehabilitation provision, as well as low and medium secure services.

The project was delivered within a live

hospital environment in extremely close proximity to existing operational facilities.

As an established provider of fenestration products to the mental health sector, Britplas designed and installed our proprietary Safevent windows as well as curtain walling, casement windows and doors.
