

OP Anti-Ligature Handle

Safety enhancing anti-ligature door handle for mental health environments

REDUCED LIGATURE RISK

Handle and backplate formed from a single piece of stainless steel designed to eliminate edges and jointing. It's smooth design helps prevent attachment of ligatures.

ERGONOMIC DESIGN

The unique design allows for a solid and reliable grip with either hand.

ANTI-TAMPER FIXINGS

Handle fixed with stainless steel rivets helps prevent tampering and loosening over time.

EASY AND EFFECTIVE MAINTENANCE

Brushed stainless steel finish and single piece handle with no joints makes cleaning quick, easy and effective.

ROBUST DESIGN

Made from stainless steel the handle's robust design provides a durable and long-lasting option to enhance safety and security.

FEATURES	
Dimensions	
Length	218 mm
Width	48mm
Height	37mm
Material	
Handle and backplate	Stainless Steel 304
Finish	Brushed stainless steel
Rivets	Stainless steel
Quality	
Manufacturing	Manufactured in accordance with ISO9001/2008 (certificate available)
Installation	Installed in accordance with ISO9001/2008 (certificate available)
Sustainability	
The handle is manufactured from stainless steel which is environmentally sustainable and can be fully recycled supporting building energy performance	
Warranty	
12 months	
Testing	
Tested to DHF TS001:2013 Enhanced Requirements & Test Methods for Anti-Ligature Hardware - Grade 4 achieved.	

Further technical drawings/models are available on request.
